

Siam Investment Fund operates a highly selective private-placement program that only accepts clients introduced by its approved authorized associates. I am one of those authorized associates. My role is to evaluate prospective investors, verify the legitimacy and ownership of their funds, conduct independent compliance checks, including FBI, OFAC, and international blacklist screening—and confirm that the client is the sole and exclusive signatory for their capital.

A client is **not** accepted simply because they have funds or because government authorities clear them. If a client cannot work with me, refuses to cooperate, or is not honest, the platform will not proceed. Trust and professional behavior are mandatory. After I recommend a client, the platform conducts its own internal checks, authority checks (INTERPOL, FBI, Homeland Security, etc.), bank verification through DBS Singapore and Hong Kong, and program-specific qualification reviews. Only after all checks are cleared does the platform director or program director speak directly with the client.

Qualified investors who pass my intake process and clear platform verification participate in a structure with historic performance of **40–45% gross per month**, with net returns defined in the investment contract. My function is straightforward: I ensure only serious, verified, cooperative, compliant investors reach Siam Investment Fund — and I position them to succeed.

Regards,
